

THIS PRODUCT CONTAINS KRILL OIL

THIS DOESN'T HELP YOUR HEALTH. IT COSTS THE PLANET'S.

Krill form the base of the Antarctic food web — feeding whales, penguins, seals and fish.

You don't need krill for omega-3s. The **same omega-3s** come from plants and algae, without emptying the ocean.

Removing krill + less food for whales = collapse of the ecosystem we all depend on.

@Shikibuntu

"I am because we are. And because Earth lives."
